PHYSALIS

by Cristina Celestino

WONDERGLASS

Physalis stands out for its characteristic lantern shape. Like its short-lived and organic gooseberry inspiration, delicate pulegoso glass is used to represent the gossamer carapace. The tiny bubbles captured within the glass sparkle when lit and give an ethereal ambience: imperceptible, delicate and shimmering.

MATERIALS

Flowers | Blown pulegoso glass

Structure | Metal

COLOURS

Flowers | Ruby

Structure | Bronze brushed

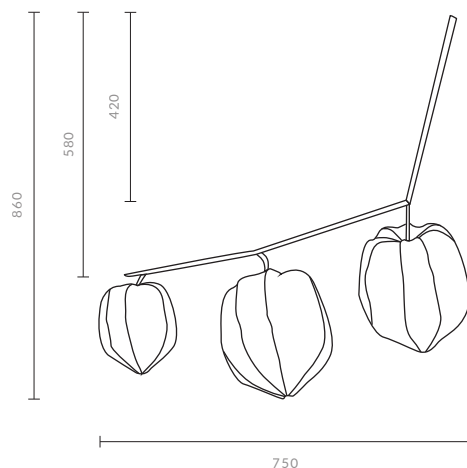

DIMENSIONS

W 750 x D 250 x H 860 MM | 7 kg
