WONDERGLASS

ÉOS

by atelier oï

Éos, a work inspired by encroaching lava, takes its form from the transitional moment when molten magma becomes igneous stone – liquid to solid – once lava reaches the planet's surface. Inspired by the Gaia hypothesis which proposes that all organisms interact with their inorganic surroundings and thereby co-create a synergistic, self-regulating system to provide the bedrock for life, glass pieces are shaped by gravity to create the illusion of liquid on the brink of overflowing – spilling into being.

Limited edition of “one of one.”

MATERIALS

Cast Glass

DIMENSIONS

Ø 280 x Ø 180 x H 120 MM

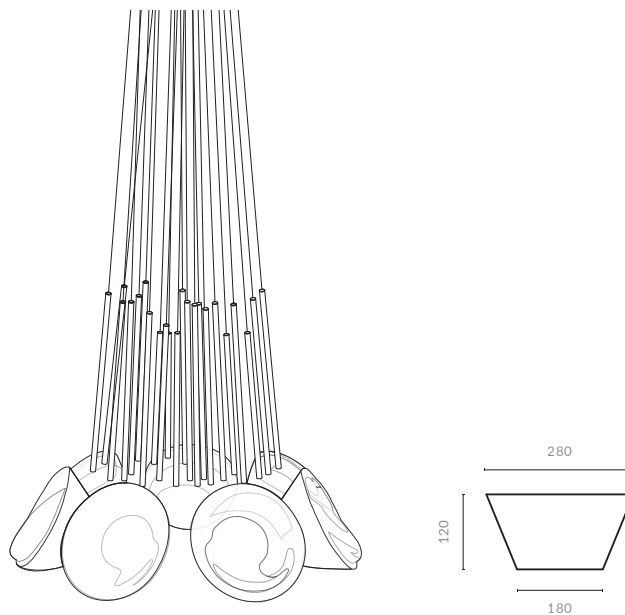

LIGHT FITTING

The lighting system for Éos is developed by atelier oï expressly for Gaïa Collection and is produced by WonderGlass solely for these models.
