WONDERGLASS

Kimera is an utopia, something impossible to finalise as it is always evolving, and it symbolises a mythological creature made up of contrasting animals, such as snake, goat, lion. In the same way, the Kimera lamp is a fusion of different techniques and materials, from extremely technological, to fascinatingly ancient, like the filigree blown glass. This allows the object to become a shell of light, a hybrid floating organically in space.

Numbered edition.

MATERIALS

Body | Blown filigree glass

Structure | Metal

Light | LED dimmable

COLOURS

Filigree

DIMENSIONS
