WONDERGLASS

Capturing the gentle glow of twilight, Dusk collection integrates a folded sheet of bronzed glass with a spherical light source. Paying homage to the profound symbolism of the sun's descent in Japanese cultural heritage, the collection breathes life into this timeless motif through the ethereal presence of the blown glass "sun," cradled within the embrace of the fused glass "evening sky." As the lamps are arranged in a harmonious procession, their varying heights and positions evoke the gradual manifestation of dusk, while their sculptural profile is emphasised by the lights' muted glow.
