WONDERGLASS

Graft explores the dichotomy between the lived experience of domesticity and the intellectual ideals of architecture and design. The use of steel and cast glass adorned with handcrafted artistic Murano glass flowers serves as a juxtaposition, evoking childhood memories of home while questioning the rationality of Modernist ideologies. By addressing these themes, Graft pays homage to the humble handmade objects and decorative items of domestic life, ultimately shedding light on the enduring tension between personal experiences and design principles.

Limited edition of 8 + 1 + 1.
